BIOLAN ENVIRONMENTAL PERFORMANCE 2025

BIOLAN is certified under the standard **ISO 14001:2015** as of 2023 and is also firmly committed to the Sustainable Development Goals.

BIOLAN's activity has impacted on
12 of the 17 SDG

61 accions carried out in the impacted SDG

Management Policy

Define core values and principles, including

commitment to the environment.

Available on the BIOLAN website for all stakeholders.

BIOLAN's objective

Identify actions to reduce negative impacts on the environment resulting from our activity.

BIOLAN calculates the
Carbon Footprint for
Scope 1 + 2

in 2025

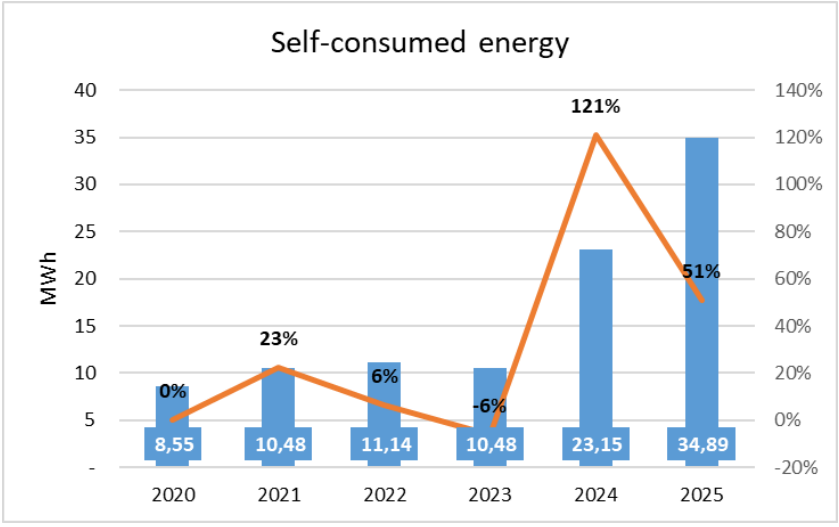
13% reduction in the Carbon Footprint for Scopes 1 and 2.

Offsetting **12,94% of all CO_2 emissions generated**.

ENERGY CONSUMPTION

Two installations of 12 kW and 20 kW PHOTOVOLTAIC PANELS

Two charging points for electric cars

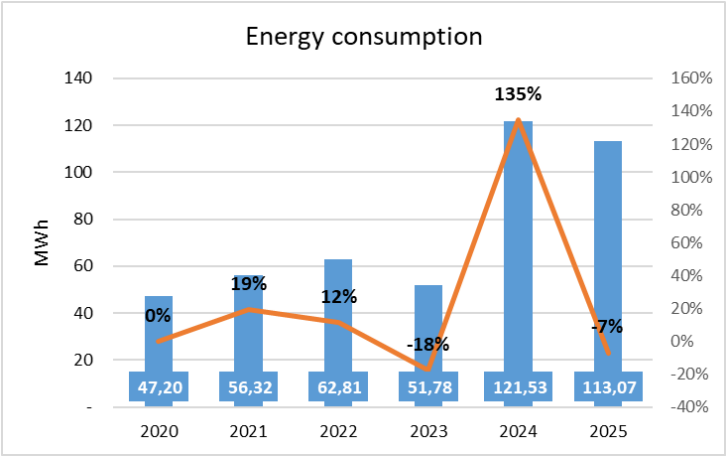


Increase of 51% in self-produced energy consumption in 2025

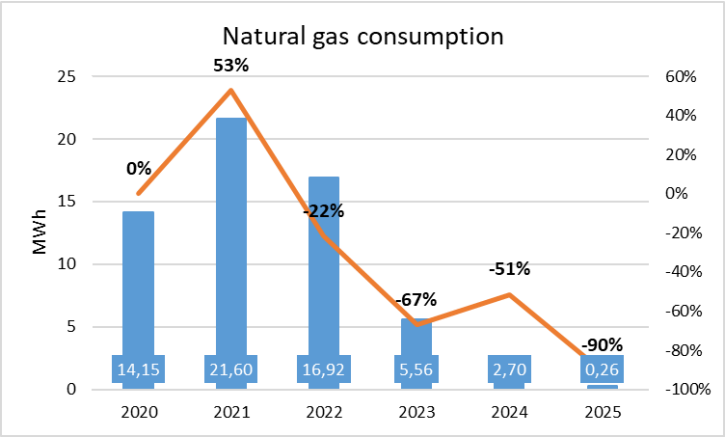
Energy consumption evolution of energy produced by the photovoltaic panels installed at BIOLAN

ENERGY CONSUMPTION

Reduction of 7% in the consumption of this resource in 2025



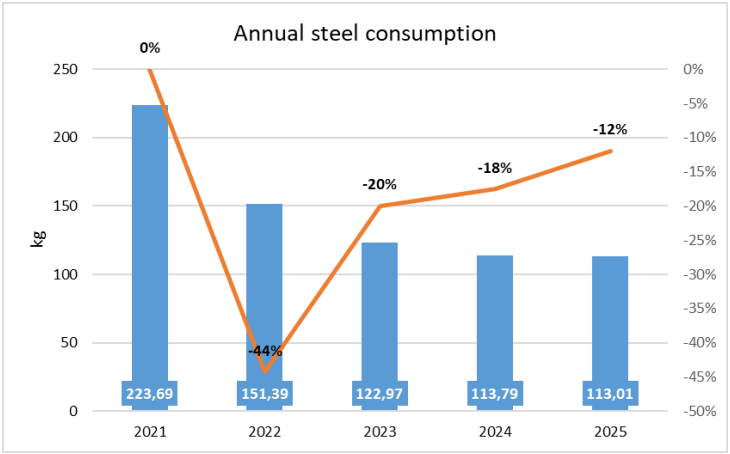
NATURAL GAS



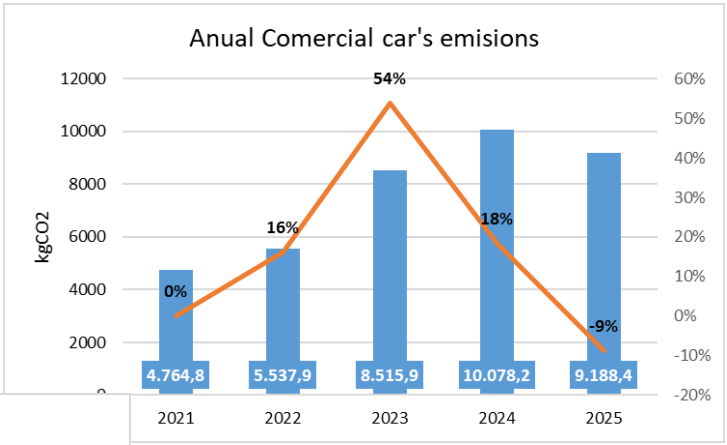
Reduction of 90% in the consumption of this resource in 2025

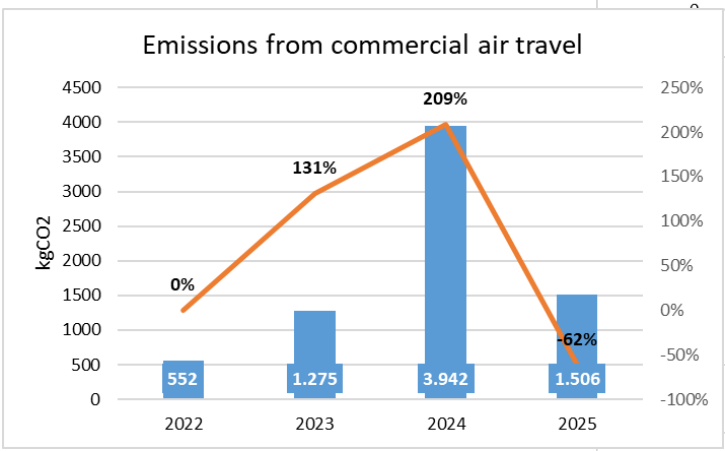
RAW MATERIALS CONSUMPTION

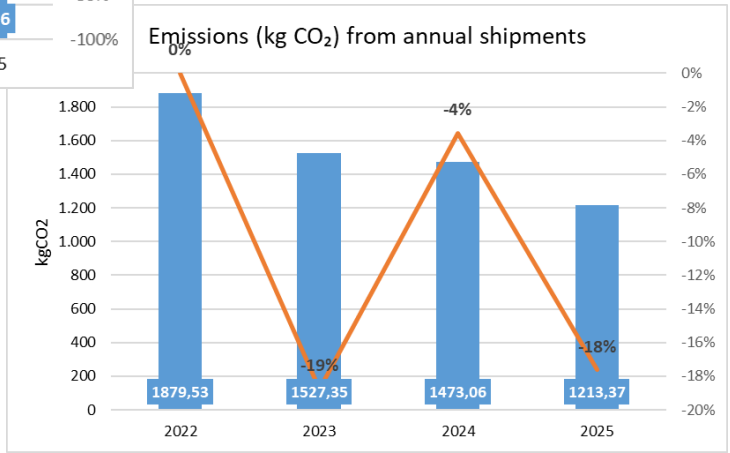
Reduction of 12% in the consumption of steel in 2025



TRANSPORT EMISSIONS







Emission reductions:

- **9%** reduction in emissions from commercial vehicles
- **62%** reduction in business air travel
- **18%** reduction in CO_2 emissions per shipment

Control and correct management of non-hazardous and hazardous waste with authorised managers and in compliance with legal requirements.

BIOLAN does not generate a high volume of waste, which does not have a significant environmental impact.

In 2025, monitoring of hazardous medical waste was introduced.

The contribution of personnel and stakeholders is

ESSENTIAL

to performance improvement.

Environmental commitment and awareness is promoted within the organisation through **CONTINUOUS TRAINING** and by adopting simple and useful measures.

Within the organisation, the **commitment to environmental, social and economic sustainability** is emphasised, with initiatives that impact on the SDGs.

Communication to suppliers of the environmental requirements to be met, asking them for a commitment to the environment.

Communication to customers of recommendations for the use of BIOLAN products.

COMMUNICATION of our environmental and social commitment to stakeholders through different media.
